NATIONAL ENGINEERING FIELD HANDBOOK  
210-VI  
MN-EFH, NOTICE 1

SUBJECT: ENG - MINNESOTA SUPPLEMENT TO NATIONAL ENGINEERING  
FIELD HANDBOOK (EFH).

Purpose. To transmit Minnesota Supplements to the EFH.

Expiration Date. September 30, 1993.

The National Engineering Field Manual (EFM) has been renamed the Engineering Field Handbook (EFH). In the past, Minnesota supplements to the EFM were kept in a separate book called the Engineering Field Manual Supplement (EFMS). This created a situation where the National EFM was not used to a great extent in Minnesota. We have taken this opportunity to reissue the Minnesota supplements and to incorporate them into the body of the EFH. The Minnesota supplements are transmitted with this bulletin. These supplement pages are labeled (MN-EFH Notice 1, Nov. 1992) and should be interleaved such that pages with a decimal number follow the appropriate page. For example, page 2-2.1 of the supplement will follow page 2-2 of the National Handbook. Pages without a decimal number follow the last page of the appropriate chapter in the National Handbook. It is recommended that the EFH be filed in two 3 inch binders. The first binder should contain chapters 1-7 and the second binder should contain chapters 8-17.

#### Filing Instructions

- File Minnesota Supplements to the EFH at locations indicated by page number.
- Discard old EFMS.
